Course Doesn't Meet Expectations	No: 1

Negative Comments:

This course didn't seem as robust as the courses I have previously taken for the data science certificate. The assignments were minimal and simple. I think this course would have been an excellent pre-requisite for the Advanced Visualization class as I struggled with the pandas in that course. I also do not understand why this course costs \$795 but is only 5 weeks and 1.5 credit hours.

I chose 'disagree' for 'The instructor's facilitation throughout the course played an important role in my learning the material.' mostly due to the simple nature of the material. The lecture was not necessary for me to complete the assignments successfully.

Great content, loved the assignments but was hoping for a project of some sort.
