Hi Yu!

I'm glad you enjoyed teaching your first course with us! We are currently planning for our Summer 2022 on-campus [Data Analytics for Business Accelerated Certificate Program](#) and were wondering if you'd be interested/available in teaching the intro course in the program, Introduction to Analyzing Data for Business Goals. The course will run **M-F, 6/22 – 7/1, 1-4pm PT on campus** for a total of 8 class sessions. The course has already been created so you wouldn't have to worry about creating any course content/material. I have attached the course syllabus to this email for you to review. Let me know if you have any questions.

Please see compensation details for teaching the course below.

- Compensation Model:
  - 4-11 students: $300 per student
  - 12-30 students: $3,500 fixed rate
  - 31-39 students: $3,500 plus $100 for each student more than 30
  - If enrollment exceeds 39 students, additional sections may be opened using the same or different instructor.

Please let me know if you are interest in/available to teach the course. I am happy to answer any additional questions you may have.

I look forward to hearing from you.

Thank you,

**Tiffany Ruvalcaba** (Ella/She)
